Pursue Your Passion at an ESF Secondary School

Study with us to develop your specialised career path

For students aged 16 to 19
(Years 12 to 13)

At ESF, we recognise that no two students are the same and that a one-size-fits-all approach simply doesn't work.

We offer personalised pathways so that students can develop their passions and pursue the subjects they value.

Our specialised pathways provide a unique opportunity for students who have identified a focus for their further studies or professional lives. These pathways allow students to focus more time on their specific areas of interest and ability so as to place themselves at an advanced stage in developing expertise in chosen fields. We also offer students experience in professional settings, where they have opportunities to interact with experts in their respective fields, providing truly authentic learning experiences.

Our specialised pathways have enabled past students to gain places at some of the top universities from around the world, such as the California Institute of the Arts (CalArts) and Bristol University, for a wide range of courses from art and design through to engineering.

Specialised Pathways at ESF

Students may choose to incorporate a Business and Technology Education Council (BTEC) diploma, on its own or as part of the International Baccalaureate Career-related Programme (IBCP) as their specialism or engage with a bespoke programme with one of our many external partners.

The table below gives a snapshot of the specialised subjects available across our schools. Please visit our individual school websites or contact the schools directly to learn more about the programme details and the qualifications awarded.
